DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to aa CPAP apparatus , classified in class 600, subclass 529.
- II. Claims 8-12, drawn to a variable speed compressor, classified in class 417, subclass 1.
- III. Claims 13-14, drawn to a diagnostic apparatus, classified in class 600, subclass 300.
- IV. Claims 15-16, drawn to a pressure monitor, classified in class 600, subclass 301.
- V. Claim 17-24, drawn to a method of CPAP therapy, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group V and Groups I-IV are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced with a materially different apparatus such as one with or without a variable speed compressor.

Inventions Group I and Groups II-IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that

Art Unit: 3742

the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a nose piece or a control system to regulate the speed of a compressor. The subcombinations have separate utilities such as a variable speed compressor and a pressure monitor.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Raymond Churchhill on 6-10-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
